

Natural Capital Development

environmental consulting, ecological and conservation services
and project management firm

Natural Resource Management

At NCD, natural resource management encompasses a wide variety of services to enhance and implement understanding of natural processes and applications.

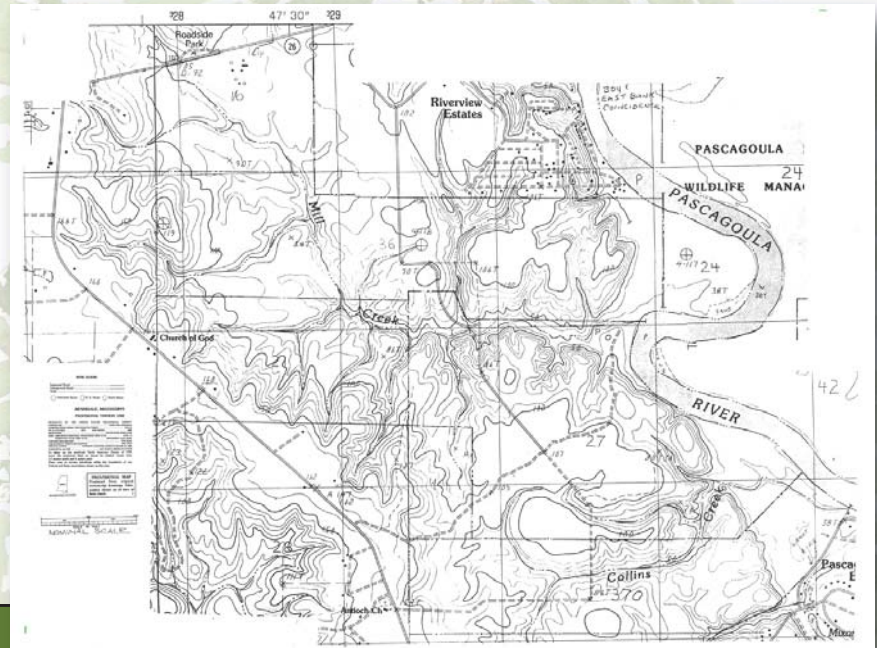

We offer a menu of options for our clients, from design-build for conservation projects or singular services to fit your needs. NCD works hard to provide our clients with valuable results using the latest sound science and technology. As leaders in ecological restoration in the Southeast, we guarantee quality work using creative approaches to planning, project development and implementation for long-term sustainability.

Environmental Planning & Project Development

- Conservation Planning & Mapping
- Site Feasibility for Natural Areas
- Site Planning & Design for Natural Areas
- Public and Government Relations
- Stakeholder Identification and Facilitation

Ecological Restoration

- Site Assessment
- Restoration Planning & Design
- Permitting
- Implementation
- Monitoring

Ecological Restoration is the process of assisting the recovery of an ecosystem that has been degraded, damaged, or destroyed (Society for Ecological Restoration 2002).

Wetlands & Stream Mitigation Banking

Natural Capital Development strives to approach wetland and stream mitigation banking from a conservation methodology, working to maximize conservation benefits while fulfilling the needs of

the mitigation banking business model. Within this model, we have developed a unique approach to increase and add value for private landowners. We offer a design-build product with services from site selection and initial assessment through final monitoring and evaluation.
